Innovation company information

Description of the innovation (1500 Character limit) Zega is smart, app-enabled, walkaway cookware that does the cooking for you. It's patented double-wall thermal insulated design and SmartControl technology heats in minutes and continues to cook safely for hours off the stove. Simply turn on the stove, add your ingredients and when it reaches the required temperature, switch off the stove and walk away. Your food continues to cook off the stove, without gas or electricity, and then stays hot for hours. You return later to a nutritious, home-cooked meal that is ready to eat. With the Zega App, you can choose from a library of recipes and remotely monitor your cooking so you're no longer a slave to the kitchen.

How does the company satisfy the innovation test? Principles based innovation test

Investors
